## Executive Summary

---

Through the generosity of **Global IT University, our eLearning partner**, we are offering a special Economic Stimulus package. As Charles F. Fox, President of Global IT University explains in the video on our website, in GITU's **Giving Back to America** program, your organization can receive this \$3,000 value for free. In fact, for a limited time, we are giving you the opportunity to **Pay It Forward** by sharing this opportunity with any other organization or business that you know could use a boost during these times of economic turmoil. Just point them to our website at [www.empowerls.com/givingback.htm](http://www.empowerls.com/givingback.htm) and let them see for themselves.

**Empowered Learning Solutions**, a service of IQT2 Corporation, offers your organization the one-stop convenience of a comprehensive, professional content library with over 5,000 titles. Each title is designed for a specific training objective, covering a wide variety of topics, and presented through our new Learning Management System (LMS). Our new LMS is designed for seamless launching, tracking and reporting. Whether your performance or talent management initiatives require training content for compliance, safety & OSHA, HIPAA, web design, IT certifications, desktop applications, business and professional development, and much more, we have the training you need.

Reaching training and development objectives can only occur when the correct content is delivered on-time to your employees. With our on-demand system you can educate and empower your team by with accelerated learning, help in complying with the latest regulations, creation of a better understanding of safety in the workplace and much more. Because these courses are delivered through our Learning Management System you have the ability to deploy and integrate your organization's content, track users and usage, and create management reports to help determine what organizational goals are met.

## Content Library Includes

---

- Microsoft Office 2000, XP, 2003, & 2007
- Microsoft Windows 98, 2000, XP, & Vista
- Professional Development & Soft skills
- Defensive Driving
- Information Technology
- Banking and Finance
- Leadership Development
- Sales Training
- Safety and Health (OSHA)
- Employment Law
- Food Safety for Food Handlers
- Machine Operators
- General HIPAA Training
- Ethics
- Communication
- Customer Service
- Human Resources
- Management
- Project Management

## Giving Back To America Package Details

To give your organization or business a kick-start during our current economic turmoil, we have selected 160 course titles from our extensive library for you to use through our Online Learning Management System for **30 days absolutely FREE**.

**Additionally, we are providing you with a multi-user license to the following training and software:**

- Office XP Training Suite – Multi-user License
- CISSP for Information Security – Multi-user License
- Our New Shred-IT File Shredding Software

Both the access to our online LearnCenter and the software above are described on the following pages.

**All we ask is that you fill out a short survey on page 9 of this document and pay our staff to process these orders for you.**

**Our Processing Fee is only \$49.95.**

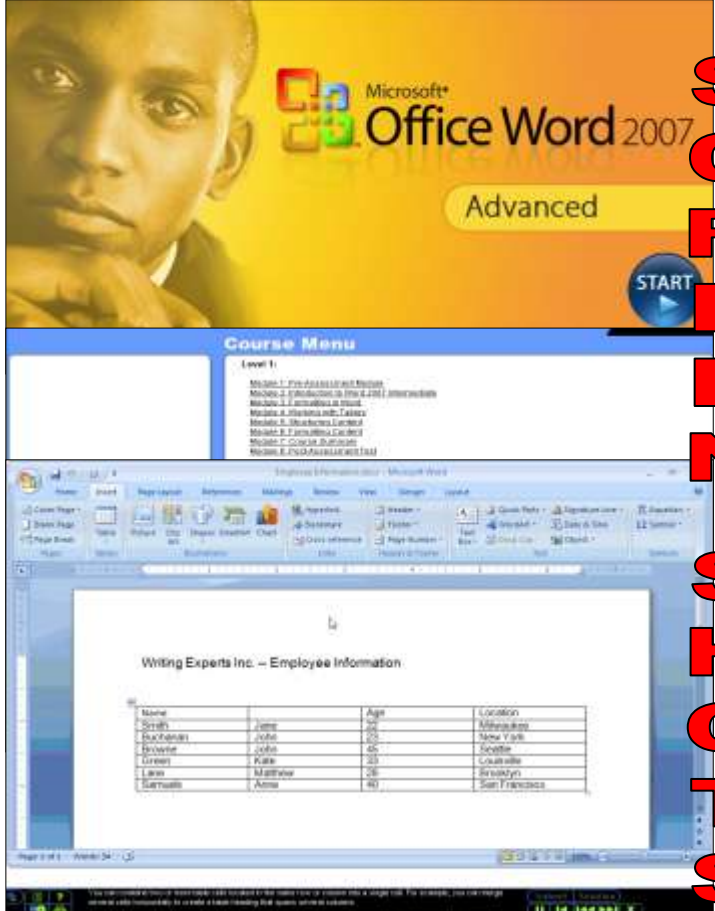

## Package Breakdown

**30 Days of access to 160 different online training titles in our Online Learning Management System.**

**Courses Included:**

- ▶ Microsoft Windows Vista
- ▶ Microsoft Word 2007, 2003, 2002, 2000

SCREENSHOTS

## PRE AND POST TESTING

Each course includes pre-course and post-course assessment testing, quizzes, optional audio, hands-on exercises, self-paced tutorials, and real-world examples and scenarios.

# SCREEN SHOTS

Each online course is highly interactive and simulates the software environment being trained.

Learners interact with rich, multimedia tutorials in real-time with minimum impact on system and network resources.

With a low bandwidth solution these courses streams in less than seven (7) seconds, even if you're on a dial-up connection.

## AWARDS

- Elearning! Magazine's "Best of Elearning 2007, and 2006 Awards"
- Training Magazines APX Award
- Written up in Training Media Review in the 2006 Report

**Beginner, Intermediate, & Advanced Training**

**Learn Microsoft Office xp**

Learn How To...

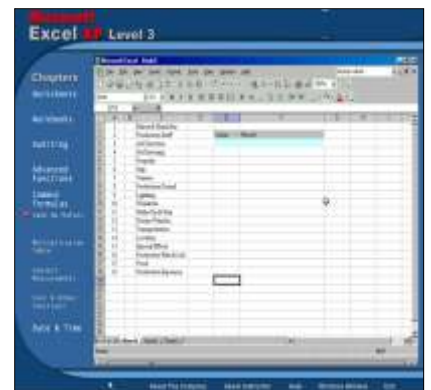

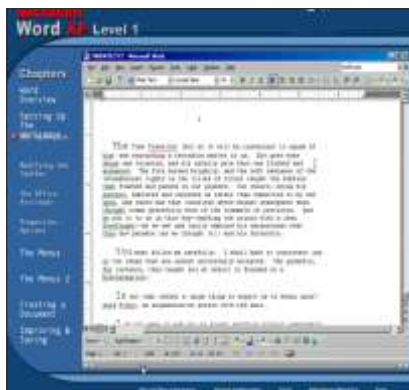

- Use tools such as task panes and the Send for Review feature to develop professional, collaborative writing projects.
- Organize and analyze complex data in Microsoft Excel 2002 by using workbooks, formulas, and charts. Share data by sending it to others for review, or publish data by using refreshable Web queries to update data automatically.
- Use the task panes of Microsoft Office XP to view information and complete tasks without having to access menus.
- Create professional presentations by using templates, animation, the Slide Design task pane, and more. Add art from the Clip Gallery, insert sounds, movies, and add pictures using the new picture compression feature.
- Use Smart Tags to view and incorporate data from other applications, such as addresses, maps, and driving directions.
- Create and manage a customized database by using Microsoft Access 2002.
- Manage e-mail, instant messages, contacts, and schedules with Microsoft Outlook 2002.

**A \$2,000.00 Value Multi-User License**

# SCREEN SHOTS

### People are the key to a secure organization!

Technological solutions alone cannot protect an organization's critical information assets.

Our CISSP training suite will help your personnel demonstrate a working knowledge of information security, enhance company's credibility, and secure valuable information.

By having CISSP training on hand you will also have the ability to give your organization a leading edge by providing the highest standard of security.

### CISSP – Certified Information Systems Security Professional

**Certified Information Systems Security Professional (CISSP)** is an independent information security certification governed by the International Information Systems Security Certification Consortium, or (ISC)<sup>2</sup>. As of June 23, 2008, (ISC)<sup>2</sup> had reported certifying 58,080 information security professionals in more than 130 countries. In June, 2004, the CISSP program earned the ANSI ISO/IEC Standard 17024:2003 accreditation, the first IT certification to have done so. CISSP has been formally approved by the U.S. Department of Defense (DoD) in both their Information Assurance Technical (IAT) and Managerial (IAM) categories. The CISSP has been adopted as a baseline for the U.S. National Security Agency's ISSEP program, which further extends the significance of the credential.

### Course Outline

---

<b>CD 1</b>		
Overview	9 Administration	18 Expert Systems (Knowledge Based)
1 About this training	10 Intrusion Detection	19 Vulnerabilities – Methods of Attack
2 About the Exam – (ISC) <sup>2</sup>	11 Respond to Attacks	
3 Recertification	12 Penetration & Vulnerability Testing	
4 Common Body of Knowledge	Domain – Application Security	Domain – Security Architecture and Design
Domain – Access Control	13 Overview	20 Overview
5 Overview	14 Systems Development Controls	21 System Components
6 Accountability	15 Application Environment	22 Security Models
7 Attack Types	16 Databases	23 Security Capabilities of Computers
8 Control Techniques	17 Data Warehousing	24 Security Evaluation

**CD 2**

Domain – Business Continuity and Disaster Recover Planning

- 1 Overview
- 2 Project Initiation & Scope
- 3 Business Impact Analysis
- 4 Threat Analysis
- 5 Disaster Recovery Strategy
- 6 Creating a Plan
- 7 Training
- 8 Maintaining the Plan

Domain – Cryptography

- 9 Overview
- 10 Ciphers
- 11 Types of Encryption
- 12 Cryptographic Systems
- 13 Key Management
- 14 Message Digests
- 15 Digital Signatures & Message Integrity
- 16 Non-Repudiation
- 17 Methods of Attack
- 18 Internet Security

- 15 Overview
- 16 Administrative Management
- 17 Operations Controls
- 18 Resource Protection
- 19 Auditing
- 20 Monitoring
- 21 Intrusion Detection
- 22 Threats and Countermeasures
- 23 Handling violations, breaches

**CD 4**

Domain – Physical – Environmental Security

- 1 Overview
- 2 Site and Facility Design
- 3 Technical Controls
- 4 Perimeter Security
- 5 Interior Security – fire, electrical, water
- 6 Operations/Facility Security
- 7 Equipment Security

- 11 LAN Technologies
- 12 Network Devices & Security
- 13 Firewalls
- 14 Fault Tolerance
- 15 Attack Prevention & Countermeasures
- 16 Remote Access

Domain – Telecommunications and Network Security

- 8 Overview
- 9 OSI Model
- 10 TCP/IP

Domain – Legal, Regulations, Compliance and Investigations

- 17 Overview
- 18 International Laws
- 19 Investigations & Evidence
- 20 Major Categories of Computer Crime
- 21 Incident Handling - Forensic Procedures
- 22 Ethics

Shred IT is an electronic file shredder for your PC.

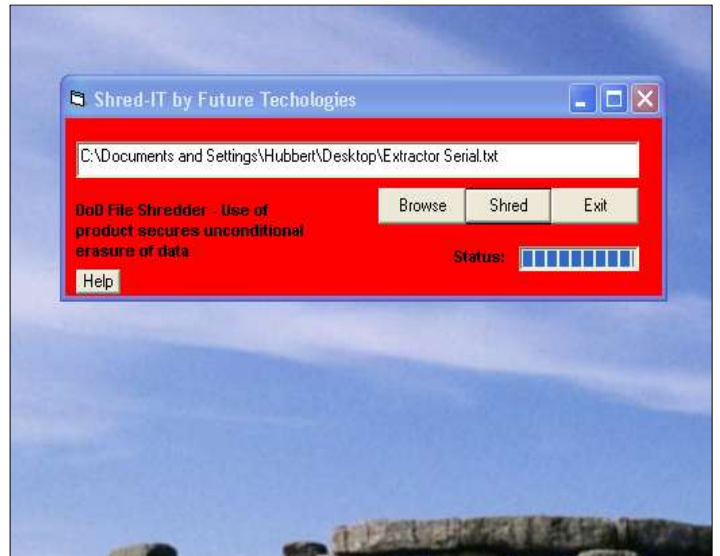

With today's technology, people commonly place more and more confidential information on their computers.

Contrary to popular belief, deleting files off of your computer it really does not actually delete the contents of the files which means they can often be recovered at a later time.

Once you delete your files using our Shred-IT software they cannot be recovered – **ever**.

This helps you to secure your data with just a click of a button.
